Presentation on

Android Operating System

History, Features, Architecture & Impact

Course Title : **OPERATING SYSTEM**
Course Code : **ICT 2201**

Presented by :

MD. Afif Zaman
ID: **IT-23059**

Presented to :

Dr. Nazrul Islam
Associate Professor

What is Android?

- Open-source mobile operating system
- Developed by Google
- Based on Linux kernel
- Used in smartphones, TVs, wearables

Android logo

History

- Android Inc. founded in 2003
- Acquired by Google in 2005
- First Android phone in 2008
- Rapid global growth

HTC Dream phone

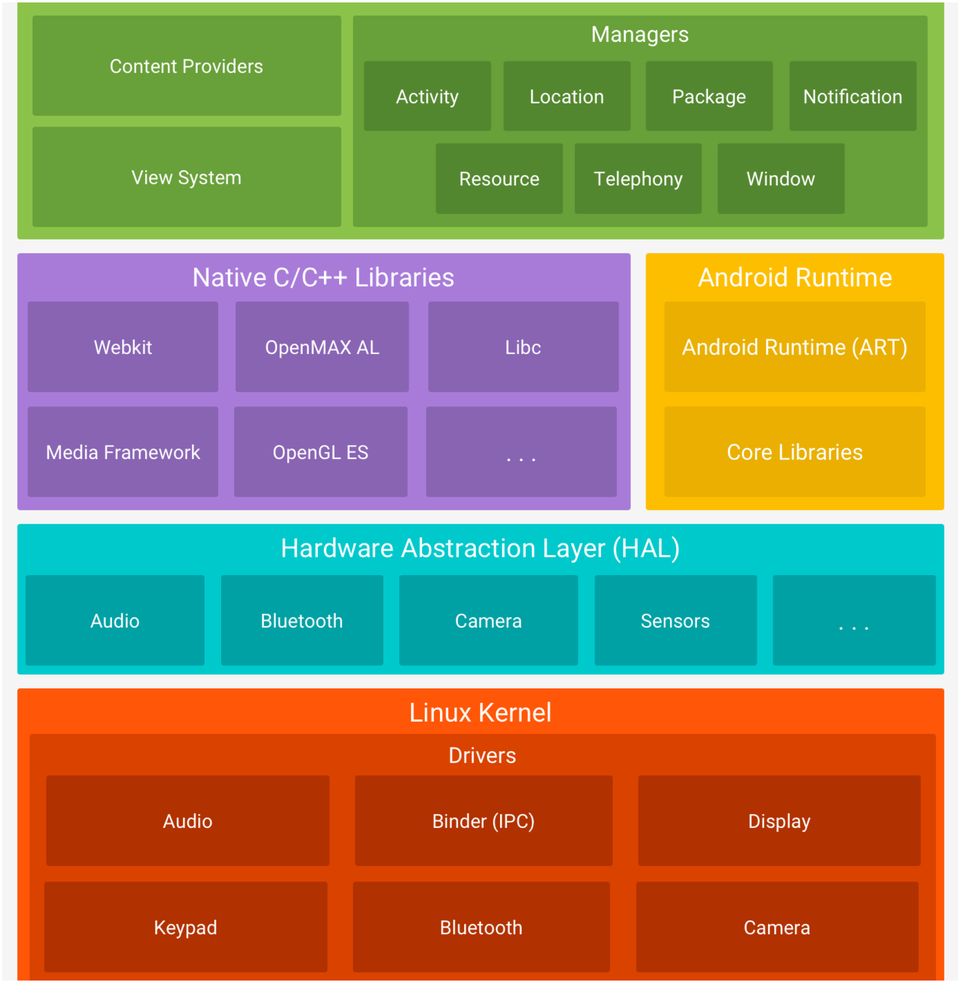
Key Features

- Open-source & customisable
- Multitasking
- Large app ecosystem
- Google services integration

Architecture

- Applications
- Application Framework
- Android Runtime (ART)
- Linux kernel

Android architecture diagram



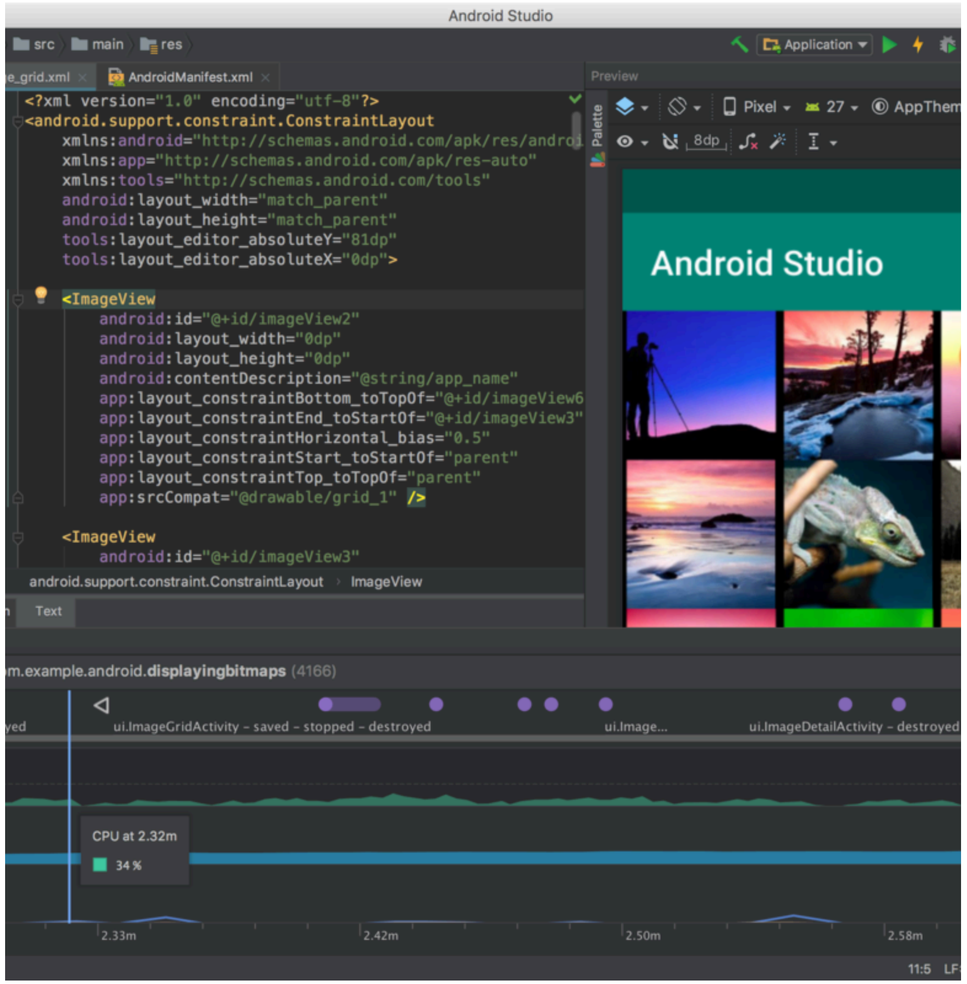
App components

- Activities → UI screens
- Services → Background tasks
- Broadcast Receivers → System events
- Content Providers → Data sharing

Development

- Android Studio (IDE)
- Languages: Java, Kotlin
- Google Play Store for apps

Android Studio



Conclusion

- Leading mobile OS
- Flexible and powerful
- Widely used worldwide
- Continuously evolving

THANK YOU
